

# Projecting to front projector only

**First step should always be to check to make sure you are on the correct Mode (Duplicate or Extend) using the Windows + P keys on the keyboard. Not doing this can result in losing the mouse pointer.**

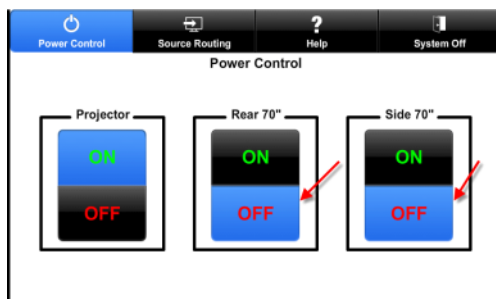

1. Touch anywhere on the touch pad screen to get to the preset options.

2. Select PC Main Overflow from the preset system options.

3. Select Power Control icon

4. Select Rear 70" OFF
5. Select Side 70" OFF
6. Select Source Routing to return to source display controls
